Subject: Desk Statement

Jennifer,

Mark is asking for some language for a desk statement that Tom could use if anyone (especially a reporter) calls EPA and asks whether we are having discussions with the dairies in the study. I think it should be brief, here's a starting point:

Attorney Client / Ex. 5

Please revise if you have suggestions.

Subject: Re: Briefing materials for Steve Chester - Yakima Valley

Hi Eric,

thanks for sending the materials. I will forward them on to my management so they have a heads up.

My understanding is that Steve Chester was present for the briefing on June 18 for Cynthia Giles and Nancy Stoner

Attorney Client / Ex. 5

Attorney Client / Ex. 5

Attorney Client / Ex. 5 I'm sure Steve will have some questions and may suggest updating Cynthia as well.

I had planned to be present for the briefing but unfortunately, I will be on travel Wed afternoon so I will not be there. Greg Snyder (Associate Division Director) will be present at the briefing and Alan Morrissey (reviewed the AOC) may be there. Both are copied on this email.

I've forwarded all of the documents you sent me to Greg so he can have hardcopies for Steve. If you make any

changes to the documents before talking with Steve, please let Greg know.

I'm around the rest of today and Tuesday next week if you want to touch base or have further questions.

Subject: Briefing materials for Steve Chester

Hi Ben,

I'm sending you some materials we're planning to use for the Steve Chester briefing next Wednesday. Most of these will look familiar. I understand there's interest in our communications strategy which is included below. Do you have a sense of whether we should plan to start off the briefing with a formal presentation using the first file below as a guide, or is Steve already familiar with that information and wants to have a more open discussion about the Communications Strategy and the general rollout?

Eric

Subject: Re: YV SAFs and CAFs

Hi Jennifer,

I like the idea of posting the data validation QA memos to the ftp site. Not only is it easy, but then the public has access to the same info as the dairies. My only suggestion is that we agree on a consistent naming convention for the pdfs before we post them. Right now, the file names are not consistent because they were done at different times by different chemists.

We could do something like...

"YV PH3 pesticides MEL 2011-02-22" or "Yakima PH3 nitrogen solids Cascade 2012-04-11". I think we need to include the date because some analyses were done in batches and the date is the only identifier that will differentiate the file name.

Someone please chime in if you have any other suggestions.

Thanks,
Sheila

Subject: YV SAFs and CAFs

Hi Chan,
The complete set of SAFs and CAFs matching Table E1 is here: Y:\Black\Yakima\QAPP Deviations SAFs and CAFs. The pdf versions are signed and attachments are included if they were needed as supporting documentation.

There is no CAF for the second item in Table E1 which explains the schedule changes.

The data validation memos are in a subfolder on the share drive. I am not sure if Jennifer sent them yet. Is there anything else you or Jennifer need to respond to the dairy's attorney request for information? Just let me know.

Thanks,

Sheila

Carbazole	(17a-Hydroxyprogesterone)
Chloramben	Ibuprofen
Chloride	Imidan (Phosmet)
Chlorpyrifos (chlorpyrifos, ethyl)	Indole
Chlortetracycline (total)	Ioxynil
Cholesterol	Iron
Chromium	Isoborneol
Clopyralid	Isophorone
Copper	Isopropylbenzene (cumene)
3beta-Coprostanol (3-beta-coprostanol)	Isoquinoline
Cotinine	Kresoxim-methyl
4-Cumylphenol	Lead
2,4-D	d-Limonene
2,4-DB	Lincomycin
Dacthal (DCPA)	Magnesium
DEET (N,N-Diethyl-meta-toluamide)	Manganese

MCPA
 MCPP (Mecoprop-p)
 Melengesterol acetate
 Menthol
 Mercury
 Metalaxyl
 Methamphetamine
 Methyl salicylate
 5-Methyl-1*H*-benzotriazole
 3-Methyl-1*H*-indole (Skatol)
 Methyl-naphthalene (1-methyl-naphthalene)
 2-Methyl-naphthalene
 Metolachlor
 Metribuzin
 Monensin
 Myclobutanil
 Naphthalene
 Naproxen
 Nitrate
 Nitrite/Nitrate+Nitrite as N (NO₃+NO₂)
 4-Nitrophenol
 4-Nonylphenol diethoxylate (NP2EO)
 (diethoxynonylphenols-total)
 4-Nonylphenol monoethoxylate (total) (NP1EO)
 4-Octylphenol (4-n-octylphenol)
 4-*tert*-Octylphenol
 4-Octylphenol diethoxylate (OP2EO)
 4-Octylphenol monoethoxylate (OP1EO)
 Oxyfluorfen
 Oxytetracycline
 p-cresol
 p-nonylphenol (total) (para-nonylphenol)
 Paraxanthine
 Pendimethalin
 Pentachlorophenol
 Perchlorate
 Phenanthrene
 Phenol
 Phosphorus (total)
 Picloram
 Potassium
 Progesterone
 Prometon
 Propargite
 Pyrene
 Ractopamine

Selenium

Silver
 Silvex (2,4,5-TP)
 Simazine
 beta-Sitosterol
 Sodium
 beta-Stigmastanol
 Sulfachloropyridazine
 Sulfadimethoxine
 Sulfamerazine
 Sulfamethazine
 Sulfamethazole
 Sulfamethoxazole
 Sulfate
 Sulfathiazole
 Surflan (Oryzalin)
 2,4,5-T
 Terbacil
 Testosterone
 11-keto Testosterone
 2,2',4,4'-Tetrabromodiphenyl ether
 Tetrachloroethylene
 2,3,4,5-Tetrachlorophenol
 2,3,4,6-Tetrachlorophenol
 Tetracycline
 Thiabendazole
 Tiamulin
 Total coliform
 Total Kjeldahl Nitrogen
 17alpha-Trenbolone
 17beta-Trenbolone
 2,4,5-Trichlorophenol
 2,4,6-Trichlorophenol
 Tributyl phosphate
 Trichlopyr
 Triclosan
 Triethyl citrate (Ethyl citrate)
 Triflumizole
 Trifluralin
 Triphenyl phosphate
 Tri(2-butoxyethyl) phosphate (TBEP)
 Tri(2-chloroethyl) phosphate (TRCP)
 Tri(dichloroisopropyl) phosphate (TDCPP)
 Tylosin
 Virginiamycin
 alpha-Zearalenol (a-zearalanol)
 beta-Zearalenol (b-zearalanol)
 Zinc

¹ Yellow - Regulated by EPA (see Table 2); Darker Blue - Listed by EPA on one of the Contaminant Candidate Lists (CCLs) (see Table 3); Lighter Blue - Reviewed by EPA but not selected for inclusion on a CCL (see Table 4). Contaminants not highlighted have not been formally considered for regulation by EPA. Previous communication from EPA may have referred to contaminants using the alternate designations contained in parentheses.

**Table 1A: Contaminants *Detected* in Residential Drinking Water Wells
by the Lower Yakima Valley Nitrate Project¹**

Alachlor	5-Methyl-1 <i>H</i> -benzotriazole
Alkalinity as Calcium Carbonate (CaCO ₃)	Monensin
Androstenedione	Nitrate
Androsterone	Nitrite/Nitrate+Nitrite as N (NO ₃ +NO ₂)
Atrazine	Perchlorate
Barium	Phenol
Bentazon	Phosphorus (total)
Bromide	Potassium
Calcium	Ractopamine
Chloride	Selenium
Chlortetracycline (total)	Sodium
Copper	Sulfamethazine
Epitestosterone	Sulfamethoxazole
Erythromycin	Sulfate
17alpha-Estradiol (17- <i>a</i> -estradiol) (<i>a</i> -estradiol)	Sulfathiazole
17beta-Estradiol (17- <i>b</i> -estradiol)	11-keto Testosterone
bis-(2-Ethylhexyl) phthalate (DEHP)	Testosterone
Fluoride	Tetracycline
Ioxynil	Tiamulin
Iron	Total coliform
Lincomycin	Tylosin
Magnesium	Virginiamycin
Manganese	Zinc
Mercury	

¹ Yellow - Regulated by EPA (see Table 2); Darker Blue - Listed by EPA on one of the Contaminant Candidate Lists (CCLs) (see Table 3); Lighter Blue - Reviewed by EPA but not selected for inclusion on a CCL (see Table 4). Contaminants not highlighted have not been formally considered for regulation by EPA . Previous communication from EPA may have referred to contaminants using the alternate designations contained in parentheses.

**Table 1B: Contaminants *Not Detected* in Residential Drinking Water Wells
by the Lower Yakima Valley Nitrate Project¹**

Acetaminophen	Diethyl phthalate
Acetophenone	2,6-Dimethylnaphthalene
Acetyl-hexamethyl-tetrahydro-naphthalene (AHTN)	Dinoseb
Acifluorfen	Diphenhydramine
Ammonia (NH ₃ +NH ₄) as N	Diuron
Amphetamine	Endosulfan I
4-Androstenedione	Endosulfan II
Anthracene	Endosulfan sulfate
Anthraquinone	<i>Escherichia coli</i>
Arsenic	Estriol
Azinphos-methyl	Estrone
Azithromycin	Ethinyl Estradiol (17-a-ethynyl-estradiol)
Benzo(a)pyrene (benz[a]pyrene)	Fecal coliform
Benzophenone	Fenhexamid
Bisphenol A	Fenpropathrin
Bromacil	Fluoranthene
Bromoform	Hexahydrohexamethyl cyclopentabenzopyran (HHCb)
Bromoxynil	17alpha-Hydroxyprogesterone (17a-hydroxyprogesterone)
3- <i>tert</i> -Butyl-4-hydroxyanisole (BHA)	Ibuprofen
Cadmium	Imidan (Phosmet)
Caffeine	Indole
Camphor	Isoborneol
Carbamazepine	Isophorone
Carbaryl	Isopropylbenzene (Cumene)
Carbazole	Isoquinoline
Chloramben	Kresoxim-methyl
Chlorpyrifos (chlorpyrifos, ethyl)	Lead
Cholesterol	<i>d</i> -Limonene
Chromium	MCPA
Clopyralid	MCCP (Mecoprop-p)
3beta-Coprostanol (3-beta-coprostanol)	Melengesterol acetate
Cotinine	Menthol
4-Cumylphenol	Metalaxyl
2,4-D	Methamphetamine
2,4-DB	Methyl salicylate
Dacthal (DCPA)	3-Methyl-1 <i>H</i> -indole (Skatol)
DEET (<i>N,N</i> -Diethyl-meta-toluamide)	Methylnaphthalene (1-methylnaphthalene)
Diazinon	2-Methylnaphthalene
Dicamba	Metolachlor
1,4-Dichlorobenzene	Metribuzin
3,5-Dichlorobenzoic acid	Myclobutanil
2,6-Dichlorobenzonitrile (benzonitrile, 2,6-dichloro-)	Naphthalene
3,4-Dichlorophenyl isocyanate	Naproxen
Dichlorprop	4-Nitrophenol
Dichlorvos	4-Nonylphenol diethoxylate (NP2EO)
Diclofop-methyl (diclofop, methyl)	

(diethoxynonylphenols-total)
 4-Nonylphenol monoethoxylate (total) (NP1EO)
 4-Octylphenol (4-n-octylphenol)
 4-*tert*-Octylphenol
 4-Octylphenol diethoxylate (OP2EO)
 4-Octylphenol monoethoxylate (OP1EO)
 Oxyfluorfen
 Oxytetracycline
 para-Cresol
 para-nonylphenol (total) (para-nonylphenol)
 Paraxanthine
 Pendimethalin
 Pentachlorophenol
 Phenanthrene
 Picloram
 Progesterone
 Prometon

Previous communication from EPA may have referred to contaminants using the alternate designations contained in parentheses.

Table 2: Regulated Contaminants Analyzed for by the Lower Yakima Valley Nitrate Project¹

Contaminants Regulated By National Primary Drinking Water Regulations

National Primary Drinking Water Regulations are enforceable standards which are established to protect the public against consumption of drinking water contaminants that present a risk to human health.

Contaminant	Concentration Range, When Detected ²	MCLG ^{2,3}	MCL ^{2,3} or TT ²	Potential Health Effects from Long-Term Exposure (unless specified as short-term) Above the MCL	Major Sources of Contamination in Drinking Water
Alachlor	0.048-0.057 ug/L	zero	2 ug/L	Eye, liver, kidney or spleen problems; anemia; increased risk of cancer	Runoff from herbicide used on row crops
Arsenic	Not detected	zero	0.010 mg/L	Skin damage or circulatory system problems; increased risk of cancer	Erosion of natural deposits; runoff from orchards, runoff from glass & electronics production wastes
Atrazine	0.015-0.11 ug/L	3 ug/L	3 ug/L	Cardiovascular system or reproductive problems	Runoff from herbicide used on row crops
Barium	0.0087-0.243 mg/L	2 mg/L	2 mg/L	Increase in blood pressure	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
Benzo(a)pyrene	Not detected	zero	0.0002 mg/L	Reproductive difficulties; increased risk of cancer	Leaching from linings of water storage tanks and distribution lines
Bromoform	Not detected	zero	0.080 ⁴ mg/L	Liver, kidney or central nervous system problems; increased risk of cancer	Byproduct of drinking water disinfection
Cadmium	Not detected	0.005 mg/L	0.005 mg/L	Kidney damage	Corrosion of galvanized pipes; erosion of natural deposits; discharge from metal refineries; runoff from waste batteries and paints
Chromium	Not detected	0.1 mg/L	0.1 mg/L	Allergic dermatitis	Discharge from steel and pulp mills; erosion of natural deposits

Copper ⁵	0.0328 mg/L	1.3 mg/L	TT; Action Level = 1.3 mg/L	<p>Short term exposure: Gastrointestinal distress</p> <p>Long term exposure: Liver or kidney damage</p> <p>People with Wilson's Disease should consult their personal doctor if the amount of copper in their water exceeds the action level</p>	Corrosion of household plumbing systems; erosion of natural deposits
2,4-D	Not detected	0.07 mg/L	0.07 mg/L	Kidney, liver or adrenal gland problems	Runoff from herbicide used on row crops
Dinoseb	Not detected	0.007 mg/L	0.007 mg/L	Reproductive difficulties	Runoff from herbicide used on soybeans and vegetables
<i>Escherichia coli</i> (<i>E. coli</i>)	Not detected	zero	Not applicable for individual wells	<p><i>E. coli</i> is regulated with the group of pathogens called coliforms. The presence of <i>E. coli</i> indicates that the water may be contaminated with human or animal wastes.</p> <p>Short term exposure: Microbes in these wastes can cause short-term effects such as diarrhea, cramps, nausea, headaches or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems.</p>	Human and animal fecal waste
bis-(2-Ethylhexyl) phthalate	1.03-5.26 ug/L	zero	6 ug/L	Reproductive difficulties; liver problems; increased risk of cancer	Discharge from rubber and chemical factories

Fecal coliform	Not detected	zero	Not applicable for individual wells	<p>Fecal coliforms are regulated with the group of pathogens called coliforms. The presence of fecal coliforms indicates that the water may be contaminated with human or animal wastes.</p> <p>Short term exposure: Microbes in these wastes can cause short-term effects such as diarrhea, cramps, nausea, headaches or other symptoms. They may pose a special health risk for infants, young children, some of the elderly, and people with severely compromised immune systems.</p>	Human and animal fecal waste
Fluoride ⁵	0.106-0.721 mg/L	4.0 mg/L	4.0 mg/L	Bone disease including pain and tenderness of the bones; children may get mottled teeth	Water additive which promotes strong teeth; erosion of natural deposits; discharge from fertilizer and aluminum factories
Lead	Not detected	zero	TT; Action Level = 1.3 mg/L	<p>Infants and children: Delays in physical or mental development; children could show slight deficits in attention span and learning abilities</p> <p>Adults: Kidney problems; high blood pressure</p>	Corrosion of household plumbing systems; erosion of natural deposits
Mercury	0.077-0.106 ug/L	2 ug/L	2 ug/L	Kidney damage	Erosion of natural deposits; discharge from refineries and factories; runoff from landfills and croplands

Nitrate ¹	0.38-71.2 mg/L	10 mg/L	10 mg/L	Short term exposure: Infants below the age of six months who drink water containing nitrate in excess of the MCL could become seriously ill and, if untreated, may die. Symptoms include shortness of breath and blue-baby syndrome.	Runoff from fertilizer use; leaking from septic tanks, sewage; erosion of natural deposits
Nitrate + Nitrite as N (NO ₃ + NO ₂) ¹	0.391-76 mg/L	10 mg/L	10 mg/L		
Pentachlorophenol	Not detected	zero	0.001 mg/L	Liver or kidney problems; increased cancer risk	Discharge from wood preserving factories
Picloram	Not detected	0.5 mg/L	0.5 mg/L	Liver problems	Herbicide runoff
Selenium ¹	0.055-0.072 mg/L	0.050 mg/L	0.050 mg/L	Hair or fingernail loss; numbness in fingers or toes; circulatory problems	Discharge from petroleum refineries; erosion of natural deposits; discharge from mines
Silvex (2,4,5-TP)	Not detected	0.05 mg/L	0.05 mg/L	Liver problems	Residue of banned herbicide
Simazine	Not detected	zero	0.004 mg/L	Blood problems	Herbicide runoff
Tetrachloroethylene	Not detected	zero	0.005 mg/L	Liver problems; increased risk of cancer	Discharge from factories and dry cleaners
Total Coliform	2-23.8 per 100ml	zero	Not applicable for individual wells	Not a health threat in themselves, total coliforms are an indicator that potentially harmful bacteria may be present.	Coliforms are bacteria that are naturally present in the environment as well as in feces.

¹ Highlighted contaminants were detected at concentrations greater than their MCLs. Selenium was detected above the MCL in two wells.

² Units are in milligrams per liter (mg/L) or micrograms per liter (ug/L). Milligrams per liter are equivalent to parts per million; micrograms per liter are equivalent to parts per billion.

³ A Maximum Contaminant Level Goal (MCLG) is the level of a contaminant in drinking water below which there are no known or anticipated adverse health effects and which allows for an adequate margin of safety. MCLGs are non-enforceable health goals. A Maximum Contaminant Level (MCL) is the maximum permissible level of a contaminant in water which is delivered to any user of a public water system. MCLs are enforceable standards and are set as close to MCLGs as feasible using the best available treatment technology, taking cost into consideration. A Treatment Technique (TT) is a required process for reduction of the level of a contaminant in drinking water.

⁴ 0.080 mg/L is the MCL for the sum of the concentrations of four trihalomethanes, as an annual average. These trihalomethanes are byproducts of drinking water disinfection (bromodichloromethane, bromoform, dibromochloromethane and chloroform).

⁵ These contaminants are also regulated by National Secondary Drinking Water Regulations.

Contaminants Regulated By National Secondary Drinking Water Regulations¹

National Secondary Drinking Water Regulations are non-mandatory water quality standards which establish “secondary maximum contaminant levels” (SMCLs) only as guidelines to assist public water systems in managing their drinking water for aesthetic considerations, such as taste, color and odor. These contaminants are not considered to present a risk to human health at the SMCL.

Contaminant	Concentration Detected	SMCL	Noticeable Effects above the SMCL
Chloride	2.38-130 mg/L	250 mg/L	salty taste
Copper ²	0.0328 mg/L	1.0 mg/L	metallic taste; blue-green staining
Fluoride ²	0.106-0.721 mg/L	2.0 mg/L	tooth discoloration
Iron	27-194 ug/L	300 ug/L	rusty color; sediment; metallic taste; reddish or orange staining
Manganese ³	2.1-22.4 ug/L	50 mg/L	black to brown color; black staining; bitter metallic taste
Silver	Not detected	0.10 mg/L	skin discoloration; graying of the white part of the eye
Sulfate¹	3.51-386 mg/L	250 mg/L	salty taste
Zinc	9-471 ug/L	5000 mg/L	metallic taste

¹ Highlighted contaminants were detected at concentrations greater than their MCLs.

² This contaminant is also regulated by National Primary Drinking Water Regulations.

³ This contaminant is also on the Contaminant Candidate list (CCL) to be considered for inclusion in National Primary Drinking Water Regulations.

**Table 2A: Regulated Contaminants Detected in Residential Drinking Water Wells
by the Lower Yakima Valley Nitrate Project¹**

Contaminants Regulated By National Secondary Drinking Water Regulations

National Secondary Drinking Water Regulations are non-mandatory water quality standards which establish “secondary maximum contaminant levels” (SMCLs) only as guidelines to assist public water systems in managing their drinking water for aesthetic considerations, such as taste, color and odor. These contaminants are not considered to present a risk to human health at the SMCL.

Contaminant	Concentration Detected	SMCL	Noticeable Effects above the SMCL
Silver	Not detected	0.10 mg/L	skin discoloration; graying of the white part of the eye

**Table 3: Contaminants on the Contaminant Candidate List Analyzed for
by the Lower Yakima Valley Nitrate Project¹**

Every 5 years EPA is required to assess at least 5 contaminants from the Contaminant Candidate List (CCL) for regulation. This assessment is based on factors including toxicity, occurrence, and analytical method availability. In addition, regulation of the contaminant must present a meaningful opportunity for health risk reduction. Contaminants not on the CCL may also be considered for regulation but do not count toward the minimum 5 CCL contaminants that must be assessed.

Contaminant	Concentration Range ²	Contaminant Type	CCL Status	Comments
3-tert-Butyl-4-hydroxyanisole (BHA)	Not detected	Organic Chemical	CCL 3	none
Diazinon	Not detected	Pesticide	CCL 1, CCL 2	Did not meet CCL 3 criteria
Diuron	Not detected	Pesticide/Herbicide	CCL 1, CCL 2, CCL 3	none
Erythromycin	0.11-0.185 ug/L	Pharmaceutical	CCL 3	none
17alpha-Estradiol	0.005 ug/L	Hormone	CCL 3	none
17beta-Estradiol	0.006 ug/L	Hormone	CCL 3	none
Estriol	Not detected	Hormone	CCL 3	none
Estrone	Not detected	Hormone	CCL 3	none
Ethinyl Estradiol	Not detected	Hormone	CCL 3	none
Manganese	2.1-22.4 ug/L	Inorganic Metal	CCL 1, CCL 3	Past negative regulatory determination (CCL 1); also regulated by NSDWR ³
Metolachlor	Not detected	Pesticide/Herbicide	CCL 1, CCL 2, CCL 3	none
Metribuzin	Not detected	Pesticide/Herbicide	CCL 1	Past negative regulatory determination (CCL 1); did not meet CCL 3 criteria
Naphthalene	Not detected	Organic Chemical	CCL 1	Past negative regulatory determination (CCL 1); did not meet CCL 3 criteria
Perchlorate	0.060-4.69 ug/L	Inorganic Salt	CCL 1, CCL 2, CCL 3	NPDWR ⁴ in development
Prometon	Not detected	Pesticide/Herbicide	CCL 1, CCL 2	Did not meet CCL 3 criteria
Sodium	5130-112,000 ug/L	Inorganic Metal	CCL 1	Past negative regulatory determination (CCL 1); did not meet CCL 3 criteria
Sulfate	3.51-386 mg/L	Inorganic Salt	CCL 1	Past negative regulatory determination (CCL 1); did not meet CCL 3 criteria; also regulated by NSDWR
Terbacil	Not detected	Pesticide/Herbicide	CCL 1, CCL 2	Past negative regulatory determination (CCL 2)
2,4,6-Trichlorophenol	Not detected	Pesticide/Herbicide	CCL 1, CCL 2	Did not meet CCL 3 criteria

¹ Highlighted contaminants were detected in residential well water by the Lower Yakima Valley Nitrate Project

² Units are in milligrams per liter (mg/L) or micrograms per liter (ug/L). Milligrams per liter are equivalent to parts per million; micrograms per liter are equivalent to parts per billion.

³ National Secondary Drinking Water Regulation

⁴ National Primary Drinking Water Regulation

Table 4: Contaminants Considered for but Not Included on Candidate Contaminant List 3 that were Analyzed for by the Lower Yakima Valley Nitrate Project¹

To develop a Contaminant Candidate List (CCL), EPA first creates a “universe” of potential drinking water contaminants². This universe is then narrowed to create a Preliminary Contaminant Candidate List (PCCL) using criteria such as potential occurrence in public water supplies and potential to cause adverse health effects. As part of the process the public is also invited to nominate chemicals³. The nominations are then assessed using these same criteria to determine if they will be included on the PCC. PCCL contaminants are then prioritized based on potential for occurrence, potential for adverse health effects, and data quality⁴ and a draft CCL is published in the Federal Register. Public comment is requested on this draft. As a result of comments on the draft CCL 3, 30 chemicals were added to the initial chemical universe and the chemicals in the universe again evaluated for CCL suitability. A final CCL is then published in the Federal Register.

Acetaminophen	Dichlorvos
Acetophenone	Diclofop-methyl
Acetyl-hexamethyl-tetrahydro-naphthalene (AHTN)	Diethyl phthalate
Ammonia (NH ₃ +NH ₄) as N	2,6-Dimethylnaphthalene
4-Androstenedione	Endosulfan I
Anthracene	Endosulfan II
Anthraquinone	Endosulfan Sulfate
Azinphos-methyl	Fenpropathrin
Azithromycin	Fluoranthene
Bentazon ⁵	Hexahydrohexamethyl cyclopentabenzopyran (HHCB)
Benzophenone	Ibuprofen
Bisphenol A	Imidan (Phosmet)
Bromacil	Indole
Bromoxynil	Isoborneol
Caffeine	Isophorone
Calcium ⁵	Isopropylbenzene (cumene)
Camphor	Isoquinoline
Carbamazepine	Kresoxim-methyl
Carbaryl	<i>d</i> -Limonene
Carbazole	Lincomycin ⁵
Chloramben	Magnesium ⁵
Chlorpyrifos	MCPA
Cholesterol	MCPP (Mecoprop-p)
Clopyralid	Menthol
3beta-Coprostanol	Metalaxyl
4-Cumylphenol	5-Methyl-1 <i>H</i> -benzotriazole ⁵
2,4-DB	3-methyl-1 <i>H</i> -indole (Skatol)
Dacthal (DCPA)	Methylnaphthalene
DEET (<i>N,N</i> -Diethyl-meta-toluamide)	2-Methylnaphthalene
Diazinon	Metribuzin
Dicamba	Methyl salicylate
3,5-Dichlorobenzoic acid	Myclobutanil
2,6-Dichlorobenzonitrile	Naphthalene
3,4-Dichlorophenyl isocyanate	Naproxen
Dichlorprop	

4-Nitrophenol
 4-Nonylphenol diethoxylate (NP2EO)
 Oxytetracycline
 4-Octylphenol
 4-*tert*-Octylphenol
 4-Octylphenol diethoxylate (OP2EO)
 4-Octylphenol monoethoxylate (OP1EO)
 para-Cresol
 para-Nonylphenol (total)
 Paraxanthine (1, 7-Dimethylxanthine)
 Pendimethalin
 Phenanthrene
 Phenol⁵
 Potassium⁵
 Progesterone
 Prometon
 Propargite
 Pyrene
 beta-Sitosterol
 beta-Stigmastanol
 Sulfadimethoxine
 Sulfamerazine
 Sulfamethazine⁵

Sulfamethizole
 Sulfamethoxazole⁵
 Sulfathiazole⁵
 Surflan (Oryzalin)
 2,4,5-T
 Testosterone⁵
 2,2',4,4'-Tetrabromodiphenyl ether
 2,3,4,5-Tetrachlorophenol
 2,3,4,6-Tetrachlorophenol
 Tetracycline⁵
 Thiabendazole
 2,4,5-Trichlorophenol
 2,4,6-Trichlorophenol
 Tris(2-butoxyethyl) phosphate
 Tris(2-chloroethyl) phosphate
 Tris(dichloroisopropyl) phosphate
 Tributyl phosphate
 Trichlopyr
 Triclosan
 Triethyl citrate (Ethyl citrate)
 Trifluralin
 Triphenyl phosphate
 Tylosin⁵

¹ While the risks associated with these contaminants at their current concentrations may not be known, EPA is working to improve its understanding of these contaminants.

² Contaminants not highlighted were included in EPA's CCL 3 Universe but did not meet criteria for further progression toward the CCL.

³ Gray – The contaminant was nominated by the public but did not meet criteria for further progression toward the CCL.

⁴ Green – The contaminant was included on the Final Preliminary Contaminant Candidate List. It may have been part of EPA's CCL 3 Universe or may have been nominated by the public.

⁵ Detected by the Lower Yakima Valley Nitrate Project, see Table 4A for additional information.

Table 4A: Contaminants Considered for but Not Included on Candidate Contaminant List 3 that were Detected in Residential Drinking Water Wells by the Lower Yakima Valley Nitrate Project¹

To develop a Contaminant Candidate List (CCL), EPA first creates a “universe” of potential drinking water contaminants². This universe is then narrowed to create a Preliminary Contaminant Candidate List (PCCL) using criteria such as potential occurrence in public water supplies and potential to cause adverse health effects. As part of the process the public is also invited to nominate chemicals³. The nominations are then assessed using these same criteria to determine if they will be included on the PCC. PCCL contaminants are then prioritized based on potential for occurrence, potential for adverse health effects, and data quality⁴ and a draft CCL is published in the Federal Register. Public comment is requested on this draft. As a result of comments on the draft CCL 3, 30 chemicals were added to the initial chemical universe and the chemicals in the universe again evaluated for CCL suitability. A final CCL is then published in the Federal Register.

Contaminant	Concentration Range ²	Contaminant Type	CCL Status
Bentazon	0.015-0.091 ug/L	Pesticide/Herbicide	Final PCCL 3, not listed
Calcium	20.8-23.8 mg/L	Inorganic Metal	CCL 3 Universe, not listed
Lincomycin	0.059-0.326 ug/L	Pharmaceutical	CCL 3 Nominated, not listed
Magnesium	74.1-85.5 mg/L	Inorganic Metal	CCL 3 Universe, not listed
5-Methyl-1H-benzotriazole	1.6 ug/L	Trace Organic	CCL 3 Universe, not listed
Phenol	1.42 ug/L	Trace Organic	CCL 3 Universe, not listed
Potassium	1.9-11.7 mg/L	Inorganic Metal	Final PCCL 3, not listed
Sulfamethazine	0.053-0.055 ug/L	Pharmaceutical	CCL 3 Nominated, not listed
Sulfamethoxazole	0.04 ug/L	Pharmaceutical	CCL 3 Nominated, not listed
Sulfathiazole	0.037-0.051 ug/L	Pharmaceutical	CCL 3 Nominated, not listed
Testosterone	0.004-0.075 ug/L	Hormone	CCL 3 Nominated, not listed
Tetracycline	0.038-0.075 ug/L	Pharmaceutical	CCL 3 Nominated, not listed
Tylosin	0.029 ug/L	Pharmaceutical	CCL 3 Nominated, not listed

¹ While the risks associated with these contaminants at their current concentrations may not be known, EPA is working to improve its understanding of these contaminants.

² Contaminants not highlighted were included in EPA’s CCL 3 Universe but did not meet criteria for further progression toward the CCL.

³ Gray – The contaminant was nominated by the public but did not meet criteria for further progression toward the CCL.

⁴ Green – The contaminant was included on the Final Preliminary Contaminant Candidate List. It may have been part of EPA’s CCL 3 Universe or may have been nominated by the public.

Table 5: Contaminants Detected in Residential Drinking Water Wells by the Lower Yakima Valley Nitrate Project that are Not Currently Regulated or Being Evaluated for Regulation by the Drinking Water Program¹

Contaminant	Concentration Range²	Chemical Type
Alkalinity as Calcium Carbonate (CaCO ₃)	78-604 mg/L	Water Quality Parameter
Androstenedione	0.004 ug/L	Hormone
Androsterone	0.004-0.019 ug/L	Hormone
Bromide	0.248-1.36 mg/L	Inorganic Anion
Chlortetracycline (total)	0.049-0.119 ug/L	Pharmaceutical
Epitestosterone	0.004 ug/L	Hormone
Ioxynil	0.0063 ug/L	Pesticide/Herbicide
Monensin	0.033-1.62 ug/L	Pharmaceutical
Phosphorus (total)	0.02-0.101 mg/L	Inorganic Nonmetal
Ractopamine	0.061-0.079 ug/L	Pharmaceutical
11-keto Testosterone	0.005 ug/L	Hormone
Tiamulin	0.029-0.05 ug/L	Pharmaceutical
Total Kjeldahl Nitrogen	Not available	Water Quality Parameter
Virginiamycin	0.029-0.162 ug/L	Pharmaceutical

¹ While the risks associated with these contaminants at their current concentrations may not be known, EPA is working to improve its understanding of these contaminants.

² Units are in milligrams per liter (mg/L) or micrograms per liter (ug/L). Milligrams per liter are equivalent to parts per million; micrograms per liter are equivalent to parts per billion.

Hi Eric,

per our discussion earlier, here is the information for the date and time for the briefing with Steve to update him on the latest in the Yakima Valley case.

Wednesday, Sept. 5
1-2pm EST.

Subject: Yakima report: Draft Q's and A's - Comments due COB Wednesday June 6th

I have attached draft Q's and A's for the Yakima Report for your review and comment. A couple of things.

1. This is for internal Region 10 use only and will be used to prepare for the public meeting and to ensure we are consistent in our responses. Please do not share outside Region 10.
2. The majority of the responses are taken from the report or from discussions leading up to the finalization of the report. We do not want to revisit issues that have been discussed and resolved.
3. Please think about other questions you believe may be asked but are not included.
4. Once we get your comments, we will prepare a final Q's and A's.

Thanks.

Please provide comments by COB Wednesday June 6th.

Subject: Yakima Valley, Washington -- Nitrates Groundwater Contamination Study and Next Steps

Wanted to let you know that Dennis McLerran has a call scheduled with Nancy, Cynthia and Larry E. on Monday the 18th to follow up on the Region's plan to release our groundwater nitrates contamination study in the Yakima Valley. While the nitrate contamination problem has been well documented over the years, this is the first time likely sources of contamination are identified up gradient from polluted residential drinking water wells.

Dennis will also talk about next steps the Region is planning, including use of SDWA 1431 authority (preferably thru administrative orders on consent) as a means to focus attention and leverage broader efforts to address the problem.

Attached are slides we used to brief Dennis in April, fyi. Let me know if you need or want more information.

Thanks,

Mike B.

I just confirmed that the Sept 6th meeting with dairy producers is NOT on Dennis' calendar. Obviously, we need to correct this right away.

I also agree with Mike that a meeting is needed to confirm the rest of the events in September leading to the public meeting and release of the report .

Subject: draft message from Dennis

Hi Mark,

Below is the draft message from Dennis regarding the release of the Yakima Groundwater report. I am copying several members of the team to make sure we are still confident that we will be able to release the report in late September.

As discussed, I have another GWMA meeting next Thursday, so it would be good to get this out in advance.

To the Members of the Yakima GWMA Advisory Committee and other interested Parties

I understand from my staff, that it's been several months since residents of the Yakima Valley last received an update on the status of the Yakima Valley Nitrates Report and EPA's potential next steps. We had previously indicated that the report might be ready for distribution sometime in June, however now EPA plans to release the report in September 2012. I regret that it has taken so long to bring this project to completion. The delay is the result of several factors, including the use of some cutting edge analytical techniques, extensive peer review of the draft report and the need to coordinate internally with several offices to assure we are being consistent on some pretty complicated issues. However, we are in the final stages of completing the report and preparing for an upcoming public meeting.

We anticipate releasing the report in late September and have tentatively selected the last week of September to hold a public meeting to discuss the findings of the report with the citizens of Yakima. We intend to adhere to this new schedule and again, I offer my sincere apologies for the delay. We look forward to presenting the findings from our study soon.

Subject: RE: Confirmation of Sept. 6 meeting with EPA

Hello Steve,

We will not be expecting a response or input at this first meeting. Your impression is correct that EPA will present its findings and its plan for dealing with groundwater issues. Specifically, EPA's plan entails engaging the dairies in a dialogue, and we hope to begin the discussion of how we can work together regarding next steps at this first meeting by presenting a concept for consideration. The purpose of the meeting scheduled for September 19th is to allow the dairies some time for consideration of our offer to engage in dialogue regarding a plan for dealing with groundwater issues and to gain an understanding of your client's response prior to the public meeting and release of the report.

I hope this helps.

-Jennifer

Jennifer:

Mr. Haak asked me if you would be addressing his dairy at the meeting and if he would need to respond or provide input.

It has been my impression that EPA will present its findings and its plan for dealing with groundwater issues and how its plans will impact the dairies.

Could you shed some light?

Steve

Hello Steve and Bill,

I am writing to confirm our meeting scheduled for 1pm September 6 in the Executive Conference Room here at EPA. Please proceed first to our reception area/Service Center on the 12th floor and you will be escorted to our meeting room. Please let me know who will be accompanying you so that we will be sure to have sufficient space. For our part, EPA's group will include Dennis McLerran, Mike Bussell, Ed Kowalski, Eric Winiecki and myself. There may be a few others attending.

Thank you. We look forward to meeting with you.

I just confirmed that the Sept 6th meeting with dairy producers is NOT on Dennis' calendar. Obviously, we need to correct this right away.

I also agree with Mike that a meeting is needed to confirm the rest of the events in September leading to the public meeting and release of the report .

Hi Ben,

I'm sending you some materials we're planning to use for the Steve Chester briefing next Wednesday. Most of these will look familiar. I understand there's interest in our communications strategy which is included below. Do you have a sense of whether we should plan to start off the briefing with a formal presentation using the first file below as a guide, or is Steve already familiar with that information and wants to have a more open discussion about the Communications Strategy and the general rollout?

Subject: Yakima Report: Final edits

Thanks Jennifer. I have incorporated all of your comments except the ones below that I think we should discuss.

Thanks Sheila for incorporating Eric's, Marie's, and your comments and for all the word processing (you did not know when you came to EPA that you would become a Word expert. I guess other duties as assigned).

I am available from 10:00 - 2:00 and 3:00 - 5:00 today (Wednesday - I am at home).

Can others meet today to discuss?

Page ES-3 (comments M2 and M3) - these seem o.k. to me.

Page ES-8 (comment M5) - putting the language in the conclusions is o.k. with me.

Page 1 footnote 12 - this is fine with me

Attorney Client / Ex. 5

Appendix D (waiting for Megan to return)

Other items

1. Figures: Incorporated Eric's, Sheila, and my comments (**Anyone want to review?**) - I would like to review these. I cannot print. Sheila, can you please help me with this?
2. Appendix C: Made minor changes (**Anyone want to review?**)
3. Compiled soil and inspection reports: Kevin completed (**Anyone want to review?**).
4. Fact Sheet: Comments back to Caryn (**Anyone want to review?**) - I will look at this
5. Q's and A's: I will have revised Q's and A's out today (**Anyone want to review?**) - I will look at this.

Subject: comments on Appendices except D

Here are my remaining comments on the appendices - except D since the comment there (Sheila's?) says something like need to insert revised version so I didn't want to review an old version. I'm happy to review the revised D though.

I think that my only comment/change is in the appendix on QA/QC....

See what you think.

Subject: Yakima: Fact Sheet

I have attached, hopefully, the final fact sheet before we send off for Spanish Translation.

The reason we need to complete is that the contract with Tetra Tech to do the translation runs out on July 21st and will not be back up and available until early September.

Hence the need to complete now if we want to take advantage of the Tetra Tech contract.

Please get your comments back to Caryn and myself by Tuesday July 10th COB.

Thanks.

Subject: Re: YV SAFs and CAFs

Hi Jennifer,

If you don't have any objections, I will submit a request to our Webmasters to post these SAFs and CAFs on the Yakima project website. Let me know asap if you have any hesitation. I'll wait until next Monday to make the request.

Thanks,

Chan Pongkhamsing

Date: 08/03/2012 01:08 PM
Subject: Re: YV SAFs and CAFs

Hi Chan,

All the data validation memos are renamed for consistency and saved on OEA's share drive in the Black folder.

Y:\Black\Yakima\QA Validation Memos and Spreadsheets with Qualifiers_YV Validation Memos for posting on ftp site

I feel like the validation memos are ready to go and can be posted, but I was hoping Jennifer and Eric would read through the QAPP deviations before we post them. They are located here:

Y:\Black\Yakima\QAPP Deviations SAFs and CAFs

I also thought we might want to reconsider adding the SAFs and CAFs to Appendix E. They are summarized in Table E1, but we could easily insert them as an attachment to Appendix E.

Mike, I promise this will not be a lot of work or delay the printing the document:)

Have a great weekend.
Sheila

Subject: Re: YV SAFs and CAFs

Your naming system makes sense to me! I like the first option of keeping it short, ""YV PH3 pesticides MEL" 2011-02-22".

As soon as we are ready to post, I will complete the following request to our Webmasters:

1. all selected deviation forms and addendums to website in QAPP section:
<http://yosemite.epa.gov/r10/water.nsf/2fb9887c3bbafaaf88256b5800609bf0/1ea7e8c810acb757882576470077b0e3!OpenDocument>
2. all data validation memos to ftp site: ftp://ftp.epa.gov/reg10ftp/sites/yakima/groundwater_data/

Date: 08/03/2012 07:31 AM
Subject: Re: YV SAFs and CAFs

Hi Jennifer,
I like the idea of posting the data validation QA memos to the ftp site. Not only is it easy, but then the public has

access to the same info as the dairies. My only suggestion is that we agree on a consistent naming convention for the pdfs before we post them. Right now, the file names are not consistent because they were done at different times by different chemists.

We could do something like...

"YV PH3 pesticides MEL 2011-02-22" or "Yakima PH3 nitrogen solids Cascade 2012-04-11". I think we need to include the date because some analyses were done in batches and the date is the only identifier that will differentiate the file name.

Someone please chime in if you have any other suggestions.

Thanks,

Sheila

Yes, thank you very much Sheila. I have not sent any of the data validation memos yet. Would we post those to the ftp site too?

Can the documents be emailed to me? I didn't manage to get away and don't have much prospect of that any time soon. But I won't be in the office tomorrow - although maybe for a bit Monday.

-Jennifer.

Subject: YV SAFs and CAFs

Hi Chan,
The complete set of SAFs and CAFs matching Table E1 is here: Y:\Black\Yakima\QAPP Deviations SAFs and CAFs. The pdf versions are signed and attachments are included if they were needed as supporting documentation.

There is no CAF for the second item in Table E1 which explains the schedule changes.

The data validation memos are in a subfolder on the share drive. I am not sure if Jennifer sent them yet. Is there anything else you or Jennifer need to respond to the dairy's attorney request for information? Just let me know.

Thanks,
Sheila

Subject: Confirmation of both dates received - September 6 and 19.

Hello, I just confirmed with the third party that the dates and times that we propose for meeting with the dairies is acceptable. Now we need to confirm with the parties attending. I wonder whether that would be best done through the RA's office staff. I'm happy to communicate with them. My understanding is that the meetings will include Dennis, Mike B., Ed, Eric and I. Thought that I'd confirm with you before proceeding.
Thank you.

Hi Eric

If you can be on this call it will be welcomed. However, I went ahead and started the scheduling because the governor is asking Ecology about what is going on now. Sorry I forgot to include you on the cc list.

Subject: Schedule brief check-in meeting

Hi Tom T. and Charlie

Since we are having trouble connecting by phone. I thought that I would use email. Tom Eaton and I are hoping to schedule a half hour check-in meeting with you to

Provide update on scheduling for report roll-out and heads ups re: setting up a meeting with State and Local agencies re: report.

Determine if Ecology has taken any additional actions that we should be aware of in the valley.

Let me know if you are available this Thursday or if you have time Monday or Tuesday of next week.

8/9/12 - Thursday - anytime works for me

8/13/12 - Monday - 10am - 2:00pm; and after 4:00pm

8/14/12 - Tuesday - 1pm to 4:00pm

If none of these times work let me know.

S. Marie Jennings
Manager, Drinking Water Unit
206-553-1893

Subject: Yakima Valley QAPP documents

Hello Lori,

You asked that we share the data quality documents. We have now posted all QAPP and data validation memos to the ftp site. You can reach these documents through the following links:

<ftp://ftp.epa.gov/reg10ftp/sites/yakima/>

<http://yosemite.epa.gov/r10/water.nsf/2fb9887c3bbafaaf88256b5800609bf0/1ea7e8c810acb757882576470077b0e3!OpenDocument>

Just a reminder, we are confirmed to meet at 1pm September 6 in the Executive Conference Room here at EPA. As you know, please proceed first to our reception area/Service Center on the 12th floor and you will be escorted to our meeting room. Please let me know who will be accompanying you so that we will be sure to have sufficient space.

Thank you.

-Jennifer

Subject: Re: Confirming time to meet with dairies on 9/6/12

Hello, I have not seen an invitation locking this meeting on everyone's calendar. My understanding, confirmed during a call today is that the meeting will include Dennis, Mike Bussell, Ed Kowalski, Eric Winiecki, and me. Kendra, will you be sending out an invitation for this group, or should I do that? I am not sure how much time Dennis is allotting to these meetings, though I understand that we will begin at 1pm on September 6, and 2:30pm on September 19.

Please let me know. I will take care of reminders to the dairies prior to each meeting, but they have confirmed the times.

Subject: Confirming time to meet with dairies on 9/6/12

Hi Jennifer

Kendra Tyler is working with Dennis' calendar to get the precise meeting time with the dairies on September 6, 2012. From a review of the email traffic, it appears that the dairies have been informed that the meeting will begin at 1:00pm here in Seattle in the RA conference room. Kendra needs to confirm asap. Thanks!
